BITREGION

Redefining the Financial Future. One Soul at a Time

✳ www.bitregion.com ✳

INTRODUCTION

In 2016, Thomas Redfort and a visionary team launched ***BitRegion.com***, a
peer-to-peer helping and crowdfunding platform. The mission?
To unite people through mutual support, transforming the financial system from
within. BitRegion wasn't just a platform it was a movement.
A revolution. But in the face of challenges, tragedy struck.
Thomas, the heartbeat of the mission,
was lost not to fear or failure, but to a sudden heart attack.
While the world speculated his disappearance, his legacy lived on.

Now, *Davit Giuliani* from Georgia, Thomas's trusted partner, has reignited the
flame. With unwavering determination, he leads BitRegion into a bold new era—
honoring Thomas's dream and taking his soul... to the moon.

A MESSAGE FROM DAVIT GIULIANI

"TO THE MOON"

We are not just continuing a project—we are continuing a soul's purpose. BitRegion is for every human who believes in a better way. For those who want to give, grow, and go beyond.

This is not the end—it's the launch. Thomas's spirit is watching. Let's take BitRegion to the moon."

WHAT IS BITREGION

BITREGION IS A NEXT-GENERATION P2P (PEER-TO-PEER) HELPING PLATFORM THAT ALLOWS INDIVIDUALS ACROSS THE GLOBE TO:

- Support each other financially without intermediaries.
- Crowdfund dreams, emergencies, or causes directly.
- Build trust through verified participation and community empowerment.

It's not a bank, not a charity, but a new economic model—where help flows freely, and people power people.

This time, *BitRegion* is built on *Web3 technology* and uses the powerful *BNB Smart Chain* to transfer Bitcoin with extremely low fees. *Both BTC (native) and BTC-BEP20* formats are supported for Provide Help (PH), making the process faster and more affordable than ever before.

WHY BITREGION ON WEB 3

Web3 is powerful source of blockchain because it gives you full control, transparency, and security without needing to trust any middleman

BitRegion is Back
But This Time, It's On the Blockchain. No Middlemen, Just You & the Network.
